

Health, Safety and Environment Policy

The ministry of petroleum is committed to develop, implement, and maintain a generative Health, Safety & Environment management system which as following, all potential hazards are identified, assessed, eliminated or controlled. This will ensure the establishment of a safe environment that protects the health and safety of its employees, contractors, visitors, clients, and neighbours. Therefore, the accountability of all petroleum industry directors, supervisors, and staff is essential, for implementing, developing & continuous improvement of HSE management system.

Goals:

Eliminating all risks, harms to people & damage to environment & facilities

Approach:

Moving towards sustainable development, increased productivity, and human resources advancement by using update national & international standards.

Commitments:

- Promote adoption of process approach within HSE management
- Prioritizing health, safety, and environmental issues and prevention of accidents, injuries and pollution in the petroleum industry
- Identifying and evaluating all HSE hazards or aspects and management of their Risks to acceptable levels under normal, changing and critical conditions
- Allocating required financial, human and organizational resources for developing and implementing HSE programs and activities;
- Promoting HSE culture, transparent and constructive communication system among managers, staff and public
- Providing continual adequate basis for essential training of staff
- Complying with all HSE legislations
- Controlling documents, Reporting HSE performance openly and providing available information
- Conservation and optimized used of natural resources, economize in the use of energy and waste reduction
- Requiring contractors to manage HSE in line with this policy
- Supporting scientific & applied researches, modern and up-to-date technologies, take advantage of specialists & consulting services.
- Continuous evaluation and improvement of policy, strategies and programs in order to improve a generative HSE management system
- Regularly performance reviews of staff and pay tribute to those who have effective role in the development and improvement of generative HSE management system.

In order to achieve aforesaid goals, I and you respectful colleagues at oil industry are responsible to apply HSE standards the same as before to earn the confidence of customers, shareholders and society, meanwhile protecting human lives, national capital and natural resources and then move towards sustainable development.

Rostam Ghosemi
Minister of Petroleum
